Tred-MOR®
Carpet Cushion

Tred-MOR® Carpet Cushion

CARPET PILE HEIGHT RETENTION (CYCLES):

Carpet tested – 28 oz. commercial loop pile
Cushion tested – Tred-MOR® 2580® (0.25")

Direct glue: 95%, 89%, 87%, 85%
With Tred-MOR®: 84%, 74%, 72%, 70%
(at 25,000 / 50,000 / 75,000 / 100,000 cycles)

— Direct glue   — With Tred-MOR®

- In a comparative wear test, carpet was installed with the direct glue method and over Tred-MOR®.
- Carpet that was direct glued lost 16% pile height in 2.5 years and 30% in 10 years.
- Carpet installed with Tred-MOR® only lost 5% pile height in 2.5 years and 15% in 10 years.
- Tred-MOR® preserves appearance, extends carpet life, and reduces cost.

> While a direct glue carpet installation appears to cost 15-20% less than a Dubl-STIK® installation with Tred-MOR®, it can end up costing 15-20% more.

HERE'S HOW, USING AN EXAMPLE OF 1,000 SY INSTALLATION:

- Direct glue at $50 SY = $50,000 installed.
- Tred-MOR® (at a 15-20% higher price point) would be $57,500-$61,000 installed.
- Direct glue carpet typically gets replaced after seven years. Tred-MOR® keeps carpet looking and feeling better longer – lasting several more years.
- At 10 years, the direct glue carpet has been replaced and starting its fourth year.

COMPARISON:

- Direct glue: $50,000 / 7 years = $7,100 year x 10 years = $71,000
- Tred-MOR®: $57,500-$61,000 / 10 years = $6,100 year x 10 years = $61,000.

About Us

- Founded in 1961, Tred-MOR® is the most specified commercial carpet cushion in the flooring industry.
- As the industry gold standard, more than 2.25 billion square feet of Tred-MOR® flooring underlayment have been installed worldwide.

Why Tred-MOR®

- Extends carpet's useful life by as much as 50%
- Works to eliminate tripping hazards
- Excellent choice for rolling wheel traffic
- Acts as a shock absorber to provide a softer, more comfortable surface
- Absorbs ambient sound transmission and contributes to a quieter, more comfortable environment
- Features GUARDIAN™ antimicrobial, which inhibits the growth of mold, mildew, and odor-causing bacteria
- Best choice for use over in-floor radiant-heating systems
