

Leggett & Platt® Carpet Cushion

Dual Protection

PLUS SERIES

There's no reason to skimp on protection.

Why wouldn't you use the brand of carpet cushion that offers the most protection for your family and carpet? Only Leggett & Platt offers Dual Protection – two distinct protective features in each Plus-series carpet cushion.

Dual protection: Includes a moisture-resistant barrier that repels spills in addition to the Fresh Dimension® antimicrobial, which inhibits the growth of mold, mildew, and odor-causing bacteria.

Moisture-resistant barrier

Spills in a home are inevitable, and they can do damage that won't immediately be visible. But with Leggett & Platt's moisture-resistant barrier, a special protective barrier on the top side of the pad, spills come up cleanly and easily. This barrier makes spills manageable, keeping carpet looking new, longer.

Fresh Dimension®

Offering a new level of protection for your home, Leggett & Platt's Fresh Dimension® antimicrobial protects against mold, mildew, and odor-causing bacteria. As an EPA-registered antimicrobial treatment, Fresh Dimension is safe and effective, providing protection throughout the entire cushion – not just applied topically.
