Your best choice for carpet cushion

Tred-MOR® Overview

Why should you choose Tred-MOR®?

Tred-MOR has been the industry standard for carpet cushion since 1985. It's the perfect choice for your high-traffic public areas to keep carpet looking and feeling great longer. The synthetic rubber construction in Tred-MOR adds tensile strength and resiliency, reducing the loss in carpet pile height dramatically when compared to direct glue or carpet tile methods.

Tred-MOR carpet cushions are designed for use with the Dubl-STIK® installation method – the industry standard for commercial/hospitality carpet. This method involves gluing the cushion to the floor and then gluing the carpet to the cushion. This creates a unitary assembly that is safe for foot and wheeled traffic. Standard Tred-MOR cushions, installed with releasable adhesive, are easy to remove during future carpet replacement and even faster when our optional Quik-LIFT® backing is chosen. Tred-MOR will provide comfort underfoot, extend the life of the carpet, and mask minor subfloor irregularities.

Tred-MOR carpet cushions are also ideal for conventional stretch-in applications/installations.
